My plans for the future

Read the following example:

I believe that everybody has some plans for his or her future. This future may be a distant one or a short one, for example: the next day.

But it cannot be denied that we plan very often. The plans for the future are often connected with dreams. Dreams of a better life, interesting jobs or having a happy family.

I very often think about my future: what will happen to me? Who would I like to be in the future? What to do next in my life? I think that when I finish the secondary school, I will go to Oxford university in England. I would like to study English and become a teacher someday. I think that it is an interesting job that is needed nowadays, so I will not have a problem finding a job. I am going to work in a secondary school because, I think that it allows for self-development. It is also very easy to communicate with students at that age.
